| Other Info | Ideal Compact Solvent Cleaning Plant |
| Weight (kgs) | 200 |
| External Dimensions (WxDxH mm) | 900 x 1000 x 1060 |

## Description

ICI Designed compact vapor cleaning plant. Upgraded to include direct coupled chiller for improved vapor blanket retention and condensate return.

We have powered up this plant in our test facility and fitted a new RS Temperature controller.

This is an example of the original basic ICI mild steel, galvanized vapor cleaning plant including top and bottom thermostat control.

Two sided lip extraction (without ventilation fan supplied). Simple lift off lid included.

The water cooled system has been replaced by a direct coupled chiller plant.

This plant would represent an opportunity for solvent vapor cleaning research and development, small production runs etc.

**Due to the change in regulations the company is duty bound to make the following statement;**

**'Suitable for spares only. Not suitable for the purposes of use at work'**

**Photographs taken prior refurbishment. Our refurbishment service is not available on all machines.**
