RSA Rasamat Multi Profile De-Burring Machine

Sorry, this machine is no longer available

We might be able to meet your requirements with other Manual Linishing & Belt Grinding Machinery machines.

Stock No	PA1149
Manufacturer	RSA
Model	2002
Year of Manufacture	1999
Serial	40-1429/99H2
Condition	Good Condition, Current Model, Seen powered at RSW
R.P.M.	rotation speed 1000 + 1500
Hp/Kw	de-burring complex profile end sections
Other Info	Wide Profile Coverage
Weight (kgs)	290
External Dimensions (WxDxH mm)	485 x 980 x 1220

Description

Manually operated Rasamat de-burring machine, Ideal for de-burring complex shapes like aluminum

extrusions following a cutting operation. Workpiece is held in a profiled aperture which can be changed in seconds to another profile.

The Rasamat 2002 is a safe way to de-burr most profile sections or components.

- The wire length can be adjusted to suit the application
- As the brushes wear they can be adjusted to maintain the optimum de-burring requirement.

The operation takes only a few second per end. A section or component is de-burred by means of rotation wire brushes which rotate and spin providing a 360° de-burring operation. All the moving parts are contained within the machine and any dust or chips are also contained.

Suitable Materials

- Steel.
- Stainless Steel.
- Aluminium.
- None ferrous metals.

Photographs taken prior refurbishment. Our refurbishment service is not available on all machines.
