Model	Tristar 500
Work Envelope (WxDxH mm)	500Ø
Process Stages	3 stage
Other Info	Continuous parts cleaner

Description

The Tristar Conveyor is fitted with a continuous moving (variable speed) stainless steel track that conveys the components through the different wash & dry processes, developed to wash parts that cannot be tumbled due to risk of damage. The parts pass through a number of stages .

The Tristar houses a rotating drum which has an 'Archimedes' continuous screw fitted to the internal wall. This means that as the drum rotates, the turning of the screw moves the parts forwards. The parts go through three or stages within the
