

Gas Fired Curing Oven

Sorry, this machine is no longer available

We might be able to meet your requirements with other [Industrial Ovens](#) machines.

Stock No	OQ1102
Model	G.F Box Oven
Year of Manufacture	1998
Serial	001036
Internal Size (WxDxH mm)	2000w x 4650d x 2250mm
Max Temp	220°C
Other Info	Heavy duty Industrial batch oven
Weight (kgs)	To follow
External Dimensions (WxDxH mm)	2750 x 5000 x 2950mm

Description

This secondhand DJB oven has been built to exacting standards and is ideally suited to the paint and powder paint industries.

The Marketplace for Surface Technology.
New and Used Process Equipment & Machinery.
Machine Datasheet

Construction:-

The Oven is complete with heavy duty insulated and reinforced swing doors at each end enabling the unit to be used as a batch type through oven. The body is manufactured of Double Skin Galvanised Steel, with high grade rockwool Insulation. The explosion relief system is incorporated in the oven roof area and comprises of special panel work which is specifically designed to disintegrate and vent off to atmosphere should an explosion occur within the oven.

To ensure good performance, the DJB oven incorporates a medium pressure multi-vane centrifugal fan complete with scroll casing to provide a positive and well controlled air movement. Large duct work ensures that the high air volume will not disturb the product.

Features:-

To ensure a safe start up and shut down sequence, the Oven includes an electronic sequence control for the LPG high low gas fired burner system. This system ensures that the heater will only switch on once the fans have safely evacuated any solvent or gas fumes that may have accumulated. At the end of a shift, a simple press of the button initiates the controlled shut down cooling sequence, allowing the fans to cool the heaters properly prior to shutting down fully.

Internal usable dimensions 2000w x 4650d x 2250mm high

External dimensions 2500w x 4900 x 3200mm high
