Description

This custom made pressure wash walk-in booth is an above ground portable system, supplied as a complete unit incorporating movable open mesh galvanized steel gridding with overlaid rubber non slip matting and dual spray cleaning facility.

The system incorporates a self contained sump with triple water filters for solution storage and has a dual action spray arrangement. The unit can be used with either a pressure washer or steam cleaner connected to an internal manual spray lance or fixed spray ring for static cleaning.

The Marketplace for Surface Technology.
New and Used Process Equipment & Machinery.
Machine Datasheet

The spray system has a double high pressure filter system and three way valve for cleaning action selection.

The Booth is constructed from welded steel with box section reinforcement and incorporate a removable front section door. The upper part of the spray chamber is clad with a clean PVC material to allow the maximum amount of light into the spray chamber.

Internal dimensions 1500 x 3000 x 2000mm high

External dimensions 1720 x 3150 x 2400mm high

Photographs taken prior refurbishment. Our refurbishment service is not available on all machines.
