

Abrasive Blast Hoses EXTRA BLAST

12
BAR

HIGH-QUALITY
AND SUPER ABRASION RESISTANCE

TUBE

Black conductive NR – abrasion resistant.

REINFORCEMENT

High tensile textile cords.

COVER

Black conductive SBR/NR blend – abrasion and ozone resistant – pin pricked.

APPLICATION

Sandblast installations.

TEMPERATURE

-30°C +80°C.

BRAND TEXT

CONTRACOR® EXTRA BLAST 25 x 7 W.P. 12 BAR -
B.P. 36 BAR
CONTRACOR® EXTRA BLAST 32 x 8 W.P. 12 BAR -
B.P. 36 BAR.

BRAND TYPE

Black letters.

NOTE

Tolerances according to "RMA" class 311-A.

SAFETY FACTOR

3:1.

ABRASION RESISTANCE

According to DIN 53516:

Max. 60 mm³

Avg. 52 mm³.

Order code	Model	Price, £ (1 m)	Price, £ (roll)	ID mm	OD mm	WP bar	Stock length, m
12101	ExtraBlast-25	6,60	264,00	25	40	12	40
12102	ExtraBlast-32	7,80	312,00	32	48	12	40

Blast Hose Whipcheck Safety Cables

Contracor® blast hose Whipcheck Safety Cables are used at all blast hoses for the safe holding of coupled connections in case of accidental separation.

The Whipcheck Safety Cables relieve the couplings of the weight of the hose and reduce the danger caused by hose couplings failure. The Cables also help keeping the blast hose from whipping about in the event of a coupling failure.

Hose couplings may separate from air and blast hoses for a variety of reasons:

- Coupling screws may lose their holding power due to internal wear on the hose tubing
- Use of improper coupling screws may interfere with the proper fit between couplings and hose
- Hose outer diameter may be too small for the coupling
- The continual strain caused by pulling hoses around job sites can weaken the coupling's grip on the hose
- Couplings can also have been damaged by vehicles or other equipment.

Whipcheck Safety Cables are strongly recommended by vertical applications, when air and blast hoses are suspended. Hose couplings are not designed to support the weight of the hose. Additional supports are required to relieve the added tension.

Constructed of corrosion resistant, high strength steel, Whipcheck Safety Cables may be installed on hose-to-hose and hose-to-fixed coupling connections.

INSTRUCTIONS OF USE:

Attach blast hose safety cables at all coupled connections. Before connecting the couplings, pull back the spring-loaded loop, slip it over the blast hoses only (not the remote control lines).

Connect the hose coupling and slide the ends of the safety cable back until the cable is straight and the hose is slightly bent.

Order code	Price, £	Description
12321	10,00	Safety Cables up to 1" I.D.
12322	15,00	Safety Cables 1.1/4" – 3" I.D.

Hose Couplings CQP

For abrasive blasting hoses with an inside diameter of 25 mm or 32 mm. Compatible with hose couplings CFT on CONTRACOR® abrasive blasting machines.

Material: nylon.

Delivery: rubber washer, screws, safety clip.

Order code	Model	Price, £	Hose diameter, mm
12301	CQP-1	6,50	25 x 39
12302	CQP-2	7,00	32 x 48

Order code	Price, £	Description
12303	1,30	Rubber gasket for CQP

Hose Couplings CQT

For abrasive blasting hoses with an inside diameter of 25 mm or 32 mm. Compatible with hose couplings CFT on CONTRACOR® abrasive blasting machines.

Material: metal.

Delivery: rubber washer, screws, safety clip.

Order code	Model	Price, £	Hose diameter, mm
12311	CQT-1	7,50	25 x 39
12312	CQT-2	8,00	32 x 48

Order code	Price, £	Description
10980	0,80	Rubber gasket for CQT / CFT
