AAC Eurovent Bulk Fill Carbon Scrubber 2.5 x 2.5m

Stock Code: FT083J

Model: AAC BFV

Year of Manufacture: 2006

New or Used: Used (Second Hand)

Filter Area ft² / m²: 3000kg of activated carbon

Other Info: VOC abatement filter

Weight: 1000 empty 4500 kg full

External Dimensions (WxDxH): Ø 2500 x 2500 mm

Designed for a wide variety of applications the AAC BFV, Bulk Filter Vessels are for handling a contaminated airstream at up to 1.5m³/sec and will contain up to 3000kg of carbon media per vessel for scenarios where there is a high odour or VOC component in the airstream.

The vessels are manufactured in a Polypropylene material. The units are supplied with bespoke connection ducting sizes along with media refill ports, lifting eyes and drain connections.

These units enable a large quantity of upto 3000kg of 3M 4mm pelletised carbon media per vessel to be contained to provide both an efficient and long lasting media bed for most applications.

Typical Applications
