## Teijo C-1000SS PD1 Front Loading Aqueous Part Washer

This machine is equipped with stainless steel pump, nozzles, and heaters with motorised spinning booms.

TEIJO cleaning machines circulate the washing fluid (water and 2–5% alkaline cleaning agent) in a closed system, and filters it as it does. The sump tank is equipped with twin 12kW heaters to drive the temperature up to the desired set point and an integral oil skimmer is used to remove any tramp oil. The solution levels are automatically maintained with the autofill facility.
