An immaculate, unused water treatment system including reverse osmosis, ion exchange and UV filtration system, to supply high quality water to laboratories and small capacity chemical plants which require high levels of purity and cleanliness.

Capable of processing ultra high quality water, this unused equipment is supplied with all manuals, equipment and pipework to produce a turn key installation.

The unit is supplied with the following

Reverse Osmosis unit housed in its own unit
4 ion exchange cylinders
Softener controls and valves
Pumps
In line UV unit
2 x high quality tanks
All control gear including level switches, control heads and fittings
Associated plastic pipework
Full set of manuals
Support and spares from OEM
