

## Mobile Belt Transfer Loader

Stock No	<a href="#">VY1231</a>
Model	Mobile Process Plant Auto Feeder
Condition	From a working environment, Seen working by RSW, Excellent Condition, Seen powered at RSW
Capacity	Variable loads / height
Process Application	product feed conveyor
Other Info	Feed conveyor belt discharg 130 x 1200
Location	Our Central Warehouse, Aldridge, UK
Weight (kgs)	174
External Dimensions (WxDxH mm)	630 x 1550 x 1750

### Description

A unique and flexible, portable hopper feed belt transfer conveyor.

Used for the controlled transfer and feed of small parts to subsequent processes

This machine has height control and is mounted on wheels to enable it to be presented to any unload or loading application, making it an extremely flexible piece of equipment for the mass finishing industry.

Loading of parts can take place, either from the side or directly into a storage hopper, where a reduction gearbox drives a transfer belt which feeds products to the next process.

Photographs taken prior refurbishment. Our refurbishment service is not available on all machines.
