Almco Supersheen Horizontal DB200 Barreling Machine

Stock Code: PA1151

Manufacturer: Almco

Model: DB200

Serial: PROV175 65

New or Used: Used (Second Hand)

Capacity: 790AF x 1000 hex (13.8 cu.ft / 390Ltrs)

Type: Rotary Deburring and polishing machine

Other Info: Separate Door & Product Load/unload cart

Weight: 1030

External Dimensions (WxDxH): 1850 x 1740 x 2020

Almco Barreling Machine

The compact DB200 deburring and polishing machine is designed to take up the least amount of floor space possible. Ideal for batch parts finishing, larger individual parts, part-on-part finishing, delicate parts, or parts and media that are not compatible with vibratory finishing.

These machines process parts by rotating them in a multi-sided, heavy-gauge steel barrel that is also filled with processing media or compounds. The tumbling action inside the barrel deburrs the parts, as the top section of media continuously slides down the incline created from the barrel rotation. Cycle times are often a fraction of other finishing equipment.

The barrel rotation is powered by a Kasug 3.7 kW inverter and provides infinitely variable barrel speed control through the speed dial control located on the outside of the control panel. The barrel is driven by a direct chain drive to prevent drive slippage during the speed ramp up / ramp down part of the process.

The machine is supplied with a loading/unloading chute and a set of four mesh filter screens.
